

CONFIDENTIAL — INTERNAL PRODUCT BRIEF

 Pineapple — Complete

Project Overview

Pineapple ek premium Indian social calling app hai — boys verified female hosts ke saath audio aur video calls karte hain, aur girls har minute ki calling aur virtual gifts se earn karti hain. Yeh document poori project ki current state cover karta hai: kya ban chuka hai, kya baaki hai, aur kaise kaam karta hai.

APP CONCEPT

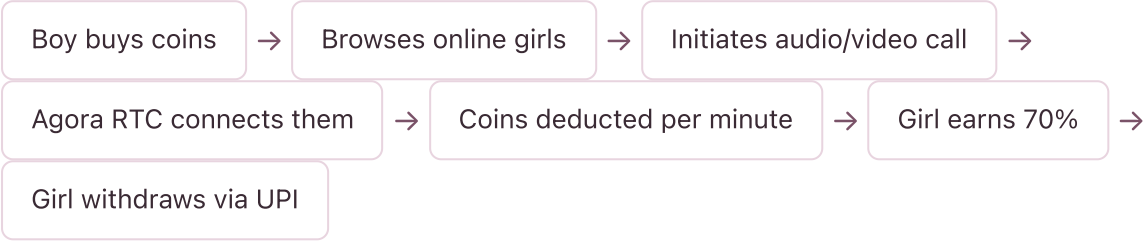

Pineapple ek Indian market ke liye bana premium **audio & video social calling app** hai. Boys coins khareed ke verified female hosts ke saath private 1-on-1 calls karte hain. Girls apni online availability set karti hain aur call time + virtual gifts se real money earn karti hain.

Think of it as a premium companion app — Cam + calling, but with a clean UX, real payment rails, and safety features built in.

TARGET USERS

USER TYPE	AGE RANGE	WHAT THEY DO	APP
Boys	18–45 years	Buy coins, call girls, send gifts, join live rooms	Boys App
Girls (Hosts)	18–35 years	Go online, receive calls, earn money via UPI withdrawal	Girls App

HOW A CALL HAPPENS

Business Model

COIN PACKAGES (BOYS BUY)

PACKAGE	PRICE	COINS	AUDIO MINUTES	VIDEO MINUTES	BONUS
Intro Trial	₹9	15 coins	15 mins	7.5 mins	One-time only
Basic	₹100	120 coins	2 hrs	1 hr	—
Standard	₹200	240 coins	4 hrs	2 hrs	—
Premium	₹500	700 coins	11.6 hrs	5.8 hrs	Lucky Spin unlocked, Premium badge

CALL RATES & GIRL EARNINGS

CALL TYPE	BOY'S COST	GIRL EARNS	PLATFORM KEEPS
Audio Call	1 coin / minute	0.7 coins = ₹0.35/min	0.3 coins (30%)
Video Call	2 coins / minute	1.4 coins = ₹0.70/min	0.6 coins (30%)

CALL TYPE	BOY'S COST	GIRL EARNS	PLATFORM KEEPS
Free Trial Call	0 coins (1-time only)	0 (platform absorbs)	—

Girls can withdraw when earnings reach **₹100 minimum**. Withdrawal request → admin processes via UPI → 3–5 working days.

ADDITIONAL REVENUE

FEATURE	HOW IT WORKS
Virtual Gifts	Boys spend coins on digital gifts (roses, chocolates, etc.) sent to girls. Girl receives equivalent coins as earnings.
Live Audio Rooms	Girls host live group audio sessions. Listeners can send gifts.
Lucky Spin	Unlocked with ₹500 Premium pack. Boys spin to win bonus coin prizes.

Backend API — All Routes Built ✓

Node.js + Express backend with MySQL database, Socket.IO real-time events, and REST API endpoints.

AUTHENTICATION — /AUTH

ENDPOINT	WHAT IT DOES
POST /auth/send-otp	Generates 4-digit OTP, sends via voice call (2Factor.in). Rate-limited to 3 OTPs per 10 minutes.
POST /auth/verify-otp	Verifies OTP, creates new user or logs in existing one. Checks age (18+) and gender-based limits.
POST /auth/firebase-login	Firebase phone authentication alternative
POST /auth/google	Google Sign-In via Firebase ID token
POST /auth/fcm-token	Saves device FCM token for push notifications

CALLS — /CALLS

ENDPOINT	WHAT IT DOES
POST /calls/initiate	Creates call record, generates Agora RTC tokens for both caller and receiver. Checks caller has enough coins.
GET /calls/:id/receiver-token	Returns Agora token for the receiving girl's device
PUT /calls/:id/end	Ends call, calculates duration, deducts coins from boy, adds 70% to girl's earnings
GET /calls/history	Returns last 30 calls for the user

PAYMENTS — /PAYMENT

ENDPOINT	WHAT IT DOES
POST /payment/create-order	Creates Razorpay order for selected coin package
POST /payment/verify	Verifies payment signature, adds coins to user wallet. ₹500 pack also unlocks Premium + Lucky Spin.

WALLET, SPIN, EARNINGS, ROOMS

ROUTE	KEY ENDPOINTS
Wallet <code>/wallet</code>	GET balance + transactions + gifts. POST <code>/gift</code> to send virtual gift. POST <code>/redeem-gift</code> to convert spin prize to coins.
Lucky Spin <code>/spin</code>	GET <code>/status</code> to check if spin available. POST to spin — server picks weighted random prize.
Earnings <code>/earnings</code>	GET girl's earnings + summary. POST <code>/withdraw</code> to request UPI payout. GET <code>/withdrawals</code> for history.
Rooms <code>/rooms</code>	GET all live rooms. POST to create a room. POST <code>/:id/join</code> to join. DELETE <code>/:id</code> to close.
Users <code>/users</code>	Profile CRUD, online status, blocking users, leaderboard data
Admin <code>/admin</code>	Admin dashboard — user management, reports, withdrawal processing
Upload <code>/upload</code>	Profile photo upload (stored in <code>/uploads</code> folder on server)
Notifications <code>/notifications</code>	Send FCM push notifications to specific users

REAL-TIME SOCKET EVENTS

EVENT	DIRECTION	PURPOSE
<code>call:ring</code>	Caller → Server	Notify receiver of incoming call
<code>call:incoming</code>	Server → Receiver	Show incoming call screen on receiver's phone
<code>call:accepted</code>	Receiver → Caller	Confirm call accepted, start Agora session
<code>call:rejected</code>	Receiver → Caller	Call declined
<code>call:ended</code>	Either → Other	End call on both sides
<code>call:unavailable</code>	Server → Caller	Receiver offline (FCM push sent instead)
<code>gift:received</code>	Server → Receiver	Real-time gift notification
<code>room:*</code>	Both ways	Live room join/leave/message events

Technology Stack

Mobile (iOS)	React Native	Mobile (Android)	React Native
Navigation	React Navigation	State Management	Redux Toolkit
Backend	Node.js + Express	Database	MySQL
Real-time	Socket.IO	Audio/Video Calls	Agora RTC SDK
Payments	Razorpay	OTP (Voice)	2Factor.in
SMS OTP	Fast2SMS	Auth (Phone)	Firebase Auth
Auth (Google)	Google Sign-In + Firebase	Push Notifications	Firebase FCM
File Storage	Local (server uploads/)	Marketing Site	Single HTML file (no framework)

Lucky Spin — Prize Table

Spin ₹500 Premium pack ke saath unlock hoti hai. Server-side weighted random algorithm use hota hai — prizes rigged toward small wins.

PRIZE	EMOJI	COINS VALUE	INR VALUE (FOR GIRLS)	PROBABILITY
Rose	🌹	10	₹5	37.0%
Chocolate	🍫	20	₹10	27.0%
Miss (No Win)	🍀	0	—	10.0%
Pastry	🍰	50	₹25	10.0%
Miss (No Win)	🍀	0	—	10.0%
Pineapple	🍍	100	₹50	4.0%

PRIZE	EMOJI	COINS VALUE	INR VALUE (FOR GIRLS)	PROBABILITY
Heart	❤️	200	₹100	1.2%
Perfume	🌸	500	₹250	0.5%
Crown	👑	5,000	₹2,500	0.2%
Diamond	💎	10,000	₹5,000	0.1%

What's NOT Built / Pending

CRITICAL — LAUNCH BLOCKERS

- **Production Server Deployment**

Backend abhi dev environment mein chal raha hai. Code mein ngrok URLs hain. Real server chahiye (DigitalOcean / AWS) deploy karna baaki hai.
- **Production API Keys Configure Karna**

Razorpay, Agora, Firebase, Fast2SMS ke production keys set karne hain. Abhi test/dev mode mein hain.
- **App Store Submission (iOS — Boys + Girls)**

Apps built hain, physical device pe tested hain, lekin Apple App Store mein submit nahi hue. App Store review process 1–3 din ka hota hai.
- **Google Play Submission (Android — Boys + Girls)**

Android APKs ready hain lekin Play Store mein publish nahi hue.
- **Girls Verification / Approval Flow**

Koi bhi girl sign-up karke "host" ban sakti hai — admin approval workflow nahi bana. Girls ko manually verify karna zaruri hai before they go live.
- **Cloud File Storage**

Profile photos abhi server ki local /uploads/ folder mein store ho rahi hain. Server restart/redeploy pe sab photos delete ho jayenge. S3 ya Cloudinary connect karna zaroori hai.

IMPORTANT — NEEDED SOON AFTER LAUNCH

- **Admin Withdrawal Processing**

Girls withdrawal request karti hain, lekin admin panel mein manual UPI payment karne ka clear workflow nahi bana. Manual process tab tak chalega jab tak automated nahi hota.

- **Chat / Text Messaging**
Call se pehle ya baad mein koi in-app text chat nahi hai. Boys aur Girls ko call ke alawa communicate karne ka koi tarika nahi.
- **Content Moderation**
Koi automated ya manual content moderation system nahi hai. Report feature hai backend mein, but admin review process unclear hai.
- **Analytics Integration**
Koi analytics nahi — Firebase Analytics ya Mixpanel integrate karna hoga taaki user behavior samjha ja sake.
- **Multi-Language UI**
Language selection screen hai, lekin full Hindi/English translation strings incomplete ho sakti hain. Verify karna baaki hai.

NICE TO HAVE — FUTURE FEATURES

- **Video Live Streaming**
— Abhi sirf audio live rooms hain. Video live stream feature future mein add ho sakta hai.
- **Referral / Invite System**
— Referral codes se user acquisition grow karne ka koi mechanism nahi hai currently.
- **Automated UPI Payouts**
— Girls ke withdrawals abhi manually process honge. Future mein Razorpay Payout API se automate ho sakta hai.
- **Profile Verification Badges**
— Backend column hai, lekin verification workflow aur badge display UI complete nahi hai.
- **Subscription Model**
— Abhi sirf coin purchases hain. Monthly subscription plan future mein add ho sakta hai.

Launch Roadmap

#	TASK	PRIORITY	ESTIMATED TIME
1	Production server setup karo — DigitalOcean/AWS + MySQL DB configure karo, env vars set karo	Critical	1–2 days

#	TASK	PRIORITY	ESTIMATED TIME
2	S3/Cloudinary file storage — profile photos ka permanent storage	Critical	1 day
3	Girls verification workflow — admin panel mein approval flow build karo	Critical	2–3 days
4	Production API keys configure karo — Razorpay Live, Agora production, FCM, 2Factor.in	Critical	Few hours
5	End-to-end testing — real devices pe full payment → call → earnings → withdrawal flow test karo	Critical	2–3 days
6	App Store submit karo — iOS Boys + Girls app (Apple Developer account required)	High	1 day + 1–3 days review
7	Google Play submit karo — Android Boys + Girls app	High	1 day + 1–7 days review
8	Analytics integrate karo — Firebase Analytics ya Mixpanel	High	1 day
9	Chat feature add karo — in-app 1:1 messaging	Future	1–2 weeks
10	Referral system — invite codes aur referral rewards	Future	3–5 days
